

**Eastern IFCA – Habitats Regulations Assessment: Commercial beam trawling for brown shrimp (*Crangon crangon*) and pink shrimp (*Pandalus montagui*) in The Wash & North Norfolk Coast Special Area of Conservation**

**Table of Appendices**

<b>Appendix</b>	<b>Content</b>
1	Conservation objectives
2	Feature condition
3	Initial screening process
3a (Addendum)	Incorporation of intertidal mussel beds into Appendix 3
4	Natural England Correspondence
5	Low-risk pressures
6	Medium and High-risk pressures
7	Consideration of Species Sensitivity data
7a	Details of data processing
8	Abundance and diversity assessment
8a	Number of Taxa
8b	Abundance ratio
8c	<i>Abra alba</i>
8d	<i>Bathyporeia elegans</i>
8e	<i>Flustra foliacea</i>
8f	<i>Hydrallmania falcata</i>
8g	<i>Lanice conchilega</i>
8h	<i>Mediomastus fragilis</i>
8i	Mytilidae
8j	Ophiuroidea
8k	Abundance and Diversity against Recover and Maintain objectives

8l	Number of samples
9	Natural Disturbance WNNCSAC
10	Consideration of IQI Indicators
11	Consideration of seabed sediment type, depth and fishing effort
12	Biotopes of pressures Abrasion-disturbance and Removal of non-target species
