

Eastern IFCA management measures tracker

Opportunities to input to Eastern IFCA management measures development

Inshore Fisheries & Conservation Authorities have a shared vision for healthy seas, sustainable fisheries and a viable industry. In delivering this vision for the eastern district, Eastern IFCA is considering and developing management measures in relation to a range of different fisheries and drivers. Dialogue with stakeholders is crucial to this work. Information is gathered to ensure that measures are as effective as possible and so that impacts and benefits are fully explored and understood. Feedback from all stakeholders is appreciated and valued.

Below is an overview of work Eastern IFCA is currently undertaking or planning for the near future. We are sharing this programme to keep stakeholders informed and to encourage engagement with Eastern IFCA on these matters. The tracker includes links to more information if available, including how to participate when live. Eastern IFCA will update this page on a regular basis.

Please note – this is a live tracker and is subject to change.
