

## Eastern IFCA management measures consultation tracker

### *Opportunities to input to the development of Eastern IFCA management measures*

Inshore Fisheries & Conservation Authorities have a shared vision for healthy seas, sustainable fisheries and a viable industry. In delivering this vision for the Eastern district, Eastern IFCA is developing management measures in relation to a range of different fisheries and drivers. Continual dialogue with stakeholders is crucial to this work. During consultation, Eastern IFCA aim to talk to and listen to all stakeholders to ensure that management measures are as effective as possible and so that any impacts and benefits of proposed measures are fully explored and understood. Feedback from all stakeholders is appreciated and valued.

Below is an overview of the consultations that Eastern IFCA is currently undertaking or planning for the near future. We are sharing this programme to keep stakeholders informed and to encourage engagement with Eastern IFCA on these matters. The overview includes links to more information if available, including how to participate in consultations. Eastern IFCA will update this page on a regular basis.

*Please note – this is a live tracker and is subject to change.*
