KING'S LYNN CONSERVANCY BOARD.

Notice to Mariners No. 26/2020.

East Coast of England –

The River Great Ouse, South of King's Lynn

Islington Pumping Station, Construction Works
Notice to Mariners 11/2020 refers

Mariners are advised that the construction of a new drainage pumping station with an associated outfall commenced in Spring 2020 on the West Bank of the River Great Ouse at Islington, between the Smeeth Lode and Mill Basin outfalls, approximately 1000m north of the St Germans Bridge.

Works to this and existing outfall structures nearby will continue until the Autumn of 2021.

These works will involve operations on the riverbank and for a short distance out into the river with large plant and machinery. **All river users, including swimmers and paddlers are to keep well clear of the construction site at all times as some of the works may be covered at high tide and unusual currents or eddies may be experienced**.

Warning signs will be displayed to the north & south of the works, and any temporary obstructions in the river will be marked by marker buoys. Some operations will require the use of **Divers** and additional warning signs and restrictions may be required.

A: Works on the construction of the new pumping station outfall will continue until August 2021.

B: Works on the Eau Brink Outfall will continue until June 2021

C: The existing Straight Mile outfall will be infilled and removed, with works commencing 4th Jan 2021 with completion due October 2021

For further information please contact Balfour Beatty Project Manager on 07967 578420.

NtM 11/2020 is now cancelled.

10th December 2020
