

# NOTICE TO MARINERS

## North Sea – Central and Southern

August 2021

Figure. 1: Wave Glider

The instrument travels slowly on the surface under wave power. It is fitted with an orange flag, all-round white light and Radar Target Enhancer.

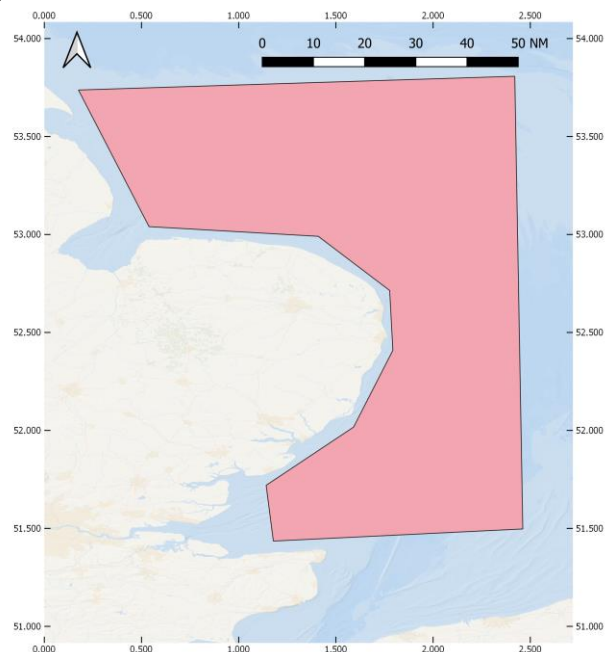

**If discovered before 25<sup>th</sup> August 2021, please leave in the water.**

The instruments are the property of the Cefas and deployed from the Cefas Endeavour.

A Wave Glider for oceanographic research will be operating in UK waters in the Central and Southern North Sea.

**Approximate north extent  
53°45'N  
Approximate south extent  
51° 30'N**

Fig. 2: Approximate Wave Glider operations area.
