Dear Owners, Ships Agents, Masters, Pilots and Fishermen,

Re: Galloper Windfarm, RWE - NTM: GWFL-O&M 2021-08 v2 ROV Subsea Inspections

Please be advised that Galloper Windfarm will continue with subsea inspections in the North field on 6 locations as part of the preparation for remedial works required on the defect Cable Protection System (CPS) NtM GWFL-O&M 2021-02. The inspection work will be carried out by Atlantis Marine operating from Icen Vengeance, Galloper Operations & Maintenance CTV.

Operations will be during daylight hours with the 'Vengeance' sailing to the field from Galloper O&M base in Harwich International Port. Mariners are requested to remain a distance of 50m away from the vessel due to an ROV being launched from the aft starboard side and flown forward by the ROV pilot.
