

Marine Debris Removal Project

Online Community Workshop Invite

Marine Debris Workshop Invitation - King's Lynn & West Norfolk - Tue 1st Feb (16:30-18:45)

The East of England Plastics Coalition Marine Debris Working Group wants to help tackle the issue of litter in the sea around The Wash and North Norfolk coast.

With the wider aim of **assisting nature recovery**, the proposed project will **support the removal of debris** from marine and coastal environments around The Wash and North Norfolk coast, and **establish sustainable disposal options**, where repair/reuse options are not viable.

A free **online** workshop will be taking place on **Tue 1st Feb (16:30-18:45)**, to share information and discuss ideas about:

- Types and quantities of marine debris (with a focus on fishing gear)
- Repair/reuse/recycle options
- Ways to support the ongoing project

Interested to know more? Keen to share your thoughts? Then please come along!

This workshop will target the King's Lynn & West Norfolk area (up to, and including, Weybourne).
