1. Introduction

RWE Renewables has contracted Fugro GB Marine Limited (Fugro) to carry out a geophysical and environmental site investigation in the North Sea for the proposed Dogger Bank South Offshore Wind Farm (DBS) site.

The Dogger Bank South Offshore Wind Farm site is located 70 Nm East of Flamborough Head on the southern edge of Dogger Bank.

3. Offshore Geophysical Investigation

The geophysical survey operations on the Dogger Bank South array site are expected to be carried out with the Fugro Frontier from 18th May 2022 until approximately the 15th December 2022.

Please note that the exact start and finish date will be dependent on the prevailing weather conditions and work progress.

Operations will continue with the Mainport Geo in the same area up to the 15th May 2022.

Important Information

As the Fugro Frontier will be towing survey equipment the vessel will require large turning circles and will be restricted in her ability to manoeuvre. All vessels operating within this area are requested to keep their distance, maintaining at least the 1,000m safety zone around the survey vessel, and pass at minimum speed to reduce vessel wash.

A continuous listening watch will be conducted on VHF Channel 16.

Survey operations will be conducted on a 24-hour basis.
