1 Introduction

Ørsted is an offshore wind farm owner and operator with ten operational wind farms in UK waters. Of these ten, the following offshore wind farms are located off the East Coast of England:

- Gunfleet Sands
- Westernmost Rough
- Race Bank
- Lincs
- Hornsea One

The purpose of this monthly Notice to Mariners (NtM) is to ensure that mariners are aware of any non-routine operations across the East Coast assets that could pose a risk to other sea users. Safety is paramount to Ørsted and this notice should assist in ensuring that both mariners and the Ørsted operational team can operate safely offshore. This NtM will provide:

- A regular, clear and consistent overview of non-routine operations
- Updates relating to lighting and marking
- Key contact details
- Access to detailed site information and figures
- Clarity on when Safety Zones and recommended safe separation distances are in force or requested

This Notice to Mariners will not provide:

- Information relating to routine maintenance carried out by Crew Transfer Vessels (CTV) or Service Operation Vessels (SOV).
- Any information relating to export cables
- Any information relating to offshore wind farms currently in development, construction or not operated by Ørsted

Subsea Cables

Subsea cables are installed across each offshore wind farm and are marked on the KIS ORCA charts referenced in Section 1.2. Please note the following advice from NP 100 The Mariners Handbook “Every care should be taken to avoid anchoring, trawling, fishing, dredging, drilling, or carrying out any other activity in the vicinity of cables which might damage them.” This warning is repeated on all admiralty charts.

Wind Farm Positional Data

KIS ORCA Awareness Charts (including the layout and coordinates) and Fishing Plotter Files of the offshore assets referenced in this NtM can be found via the KIS ORCA website: <https://kis-orca.org/downloads/> Should mariners require further information or any data in a format that can be used in a plotter or other device, please contact the Company Fisheries Liaison Officer, listed in Section 2 below.

2 Key Contacts

For further information on any of the activities listed within this notice, please use the contact details listed below.

The Ørsted Company Fisheries Liaison Officer can be contacted using the details below:

Courtney French
Email: CONFR@Orsted.co.uk

3 Notice to Mariners Summary:

Site	Lighting and Marking Status	Survey	Jack-Up Vessel	Other Works
Race Bank	OK	Yes	None	Blade campaign
Westermose Rough	A01 Fog signal	Yes	Yes	Blade LEP Main Bearing Replacement *
Lincs	OK	None	None	WTG Inspections
Gunfleet Sands	OK	None	None	HSS bearing inspection, drone inspections.
Hornsea One	H27 Fog Signal, A04 marine lantern & fog signal.	None	Yes	Shunt reactor replacement °, *

* Formal 500m safety zone in place

° Licensable activity

** 500m safety distance requested

*** 200m safety distance requested

**** 250m safety distance requested

Status of lighting & marking is correct at time of issue; any changes will be communicated through an updated version being issued.

4 Race Bank – Notice to Mariners

4.1 Lighting and Marking Status

The lighting and/ or navigational warning systems are currently operational. No planned outages.

4.2 Other Operations

4.2.1 Benthic Survey

The survey vessel Seren Las will be on site at points during June & July to complete a benthic survey. See below for locations.

Export Cable Route	See Below note	See Below note

Notes:

Text from the methodology: *At each of these, a cruciform of grab stations have been arranged with four grab stations at 150 m from the turbine on the cardinal points aligned to the dominant tidal flow and two further grab stations at 300 m distance aligned to the tidal flow.*

They will also be sampling outside of the array in the areas shown below and at locations along the export cable route.

4.2.1 Blade campaign

The CTV's Seacat Intrepid and Seacat Enterprise will be on site from the 1st June to conduct a blade campaign, we anticipate that this will take up to 2 months.

When the technicians are deployed via the ropes an exclusion zone of 150m will be required.

All 91 turbines will be visited.

5 Westermost Rough – Notice to Mariners

5.1 Lighting and Marking Status

A01 fog signal is constantly sounding, the issue is being investigated and this NTM will be updated when the problem has been fixed.

5.2 Other Operations

5.1.1 Blade LEP campaign

The CTV NSL Discovery and the SOV Island Condor will be on site to conduct the blade repairs until the end of September.

When the technicians are deployed via the ropes an exclusion zone of 100m will be required.

All 35 turbines will be visited. There will be a liaison officer on board the Island Condor who will communicate a 3-5 day lookahead of planned locations throughout the project.

6 Lincs – Notice to Mariners

6.1 Lighting and Marking Status

The lighting and/ or navigational warning systems are currently operational. No planned outages.

6.2 Other Operations

6.2.1 Inspections

The vessel World Sky will be on site for 7-14 days from the 25th May completing internal WTG inspections.

Table 5-1; Array cable exposures detected in GFS0102

8 Hornsea One – Notice to Mariners

8.1 Lighting and Marking Status

H27 Foghorn is currently inoperative. A04 marine lanterns & fog horn are currently inoperative. E01 currently has temporary marine lanterns installed.

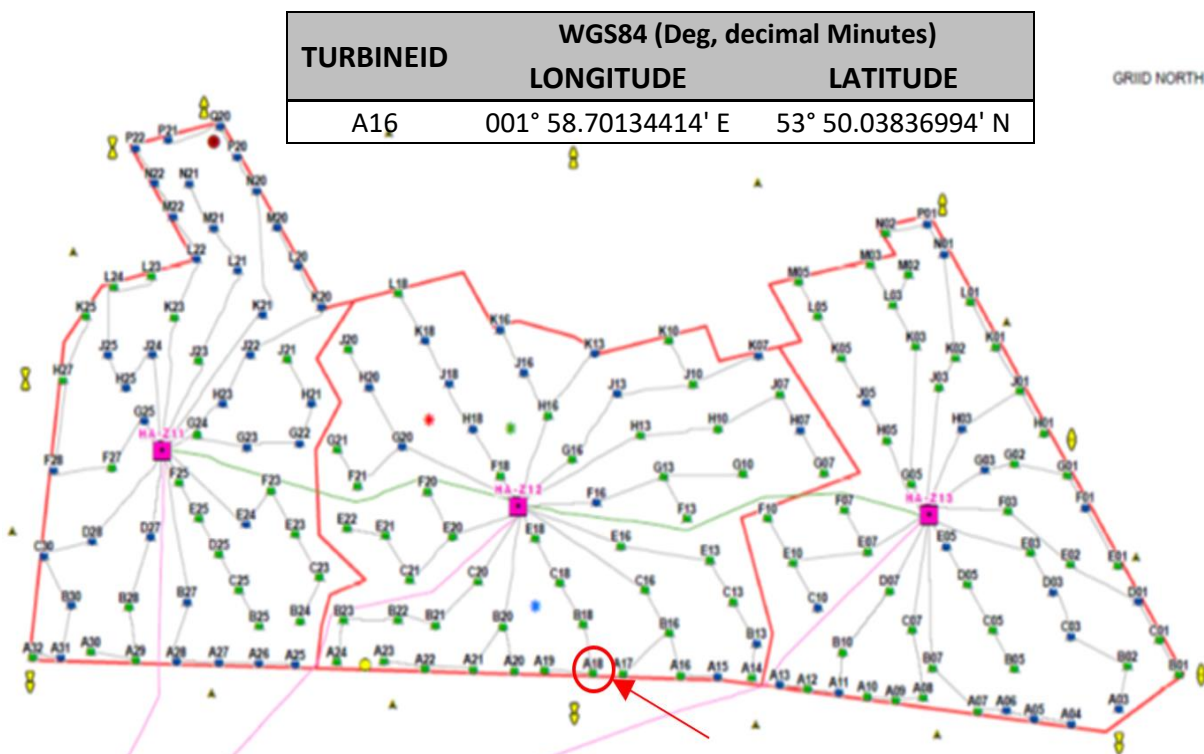

8.2 Other Operations

8.2.1 Main Bearing Replacement

Main Bearing replacement work is expected to start on 4th June, lasting approx. 6 days. Once the vessel is jacked up in position at A16, there will be the requirement for a 500m Safety Zone for the duration of the operation.

8.2.2 Z13 shunt reactor works

On the 6th of June the Jack up vessel MPI Resolution will be on site at the Offshore Sub-station Z13. –
Mariners must observe an approved safety zone of 500m whenever MPI Resolution is attached next to the
OSS Z13. A minimum separation distance of 500m is also requested when the vessel is observed
manoeuvring into position.
