### Description of Hazard/Operation

The Survey Vessel, **ARTIC Ocean**, will perform Pre-Lay Survey Operations in Dogger Bank B OWF Array Area.

The works are scheduled to be performed in a single campaign. The campaign is envisaged to commence in the Third week of September and expected to continue for 15 days. The works will be continuous, 24 hours a day. Charts of the DBB array area are provided below.

The operations consist of Bathymetric multibeam Survey along the Inter Array Cable trajectories.

During operations, the **ARTIC OCEAN** will be restricted in its ability to manoeuvre as defined under COLREGs (International Regulations for Preventing Collisions at Sea 1972) and will display the appropriate day shapes and lights. The vessel will also transmit an Automatic Identification System (AIS) message.

It is requested that all vessels maintain a minimum of 1.5Nm separation distance from the Survey Vessel and pass at reduced speed. Fishing gear or other equipment with seabed intervention should not be deployed when approaching the working corridor.
