3 WORK DESCRIPTION

During DDV survey operations, the vessel will be restricted in ability to manoeuvre. Mariners are therefore requested to provide a wide berth and to pass at a safe speed and distance.

3.1 ENVIRONMENTAL OPERATIONS

The vessel will complete environmental DDV operations throughout the Vanguard East working area. The operations entail 200m towed video camera transects and video still profiles in 73 locations.

Vessels are requested to maintain 500m distance from the survey vessel due to over-boarded equipment.

4 SCHEDULE

Environmental survey operations are expected to be carried out by either Geo Ocean V, Geo Ocean VI or the Geo Ocean VII, commencing on 13th August 2025, weather permitting. The expected duration for all works is 12 days, including weather and other downtime.

A continuous listening watch will be conducted on VHF Channel 16.

Offshore survey operations will be conducted on a 24-hour basis.
