10.1	Lighting and Marking Status	12
10.2	Other Operations	12

1 Introduction

Ørsted is an offshore wind farm owner and operator with ten operational wind farms in UK waters. Of these ten, the following offshore wind farms are located off the East Coast of England:

- Gunfleet Sands
- Westermost Rough
- Race Bank
- Lincs
- Hornsea One
- Hornsea Two

The purpose of this monthly Notice to Mariners (NtM) is to ensure that mariners are aware of any non-routine operations across the East Coast assets that could pose a risk to other sea users. Safety is paramount to Ørsted and this notice should assist in ensuring that both mariners and the Ørsted operational team can operate safely offshore. This NtM will provide:

- A regular, clear, and consistent overview of non-routine operations
- Updates relating to lighting and marking statuses.
- Key contact details
- Access to detailed site information and figures
- Clarity on when Safety Zones and recommended safe separation distances are in force or requested.
- Updates on cable burial status where available.

This NtM **will not provide**:

- Information relating to routine maintenance carried out by Crew Transfer Vessels (CTV) or Service Operation Vessels (SOV).
- Any information relating to non-Ørsted-owned assets, e.g. export cables owned by OFTOs.
- Any information relating to Ørsted-owned offshore wind farms that are currently in development or construction, or to offshore wind farms that are not owned by Ørsted.

Subsea Cables

Subsea cables are installed across all offshore wind farms and marked on Admiralty charts. Ørsted-owned subsea cables are also delineated on KIS-ORCA charts and are available for download in Fishing Plotter file format <https://kis-orca.org/downloads/>. Mariners should note the following advice from NP 100 The Mariners Handbook “*Every care should be taken to avoid anchoring, trawling, fishing, dredging, drilling, or carrying out any other activity in the vicinity of cables which might damage them.*” This warning is repeated on Admiralty charts and in MGN661 issued by the MCA.

Within a 50m radius of the base of offshore wind turbines and offshore substations cable exposures are relatively common and relatively dynamic. In line with this, it is neither practical nor beneficial for this NtM to promulgate a running commentary detailing evolving cable burial status within these radii. Ørsted recommended that mariners always maintain a safe separation distance of >50m from wind turbines and substations. This NtM details sections of exposed cable that are located out with these 50m radius. It is important to note that the position and extent of any cable exposures reported within this NtM is limited to the burial status observed when the survey was undertaken. Cable burial status will evolve over time, often rapidly. Mariners should not assume otherwise. Please review the site-specific pages below for further information.

Should mariners require further information, including any data in a Fish Plotter compatible format, please contact the Commercial Fisheries Manager Fisheries@orsted.com.

2 Key Contacts

For further information on any of the activities listed within this notice, please use the contact details listed below.

Site	Ørsted Mailbox/ Offshore Coordination	Fisheries Industry Representative
Race Bank	Phone: 07826 943808 Email: rowoffshorec@orsted.com	Ady Woods Phone: 07468 898948 Email: firwoods@hotmail.com
Westermost Rough	Phone: 07867 674941 Email: wmroffshorec@orsted.com	Guy Pasco Phone: 07880 362082 Email: guy@seascopefisheries.co.uk
Lincs	Phone: 07766443319 Email: lincsoffshorec@orsted.com	Ady Woods Phone: 07468 898948 Email: firwoods@hotmail.com
Gunfleet Sands		Merlin Jackson Phone: 07989 520484 Email: merlinjackson@btinternet.com
Hornsea One	Phone: 07775005465 Email: HOWoffshoreC@orsted.com	Nick Garside Phone: 07538 827013 Email: nick.garside@live.co.uk
Hornsea Two	Phone: 07775005465 Email: HOW02offshoreC@orsted.com	Nick Garside Phone: 07538 827013 Email: nick.garside@live.co.uk

Company Fisheries Liaison Officer

The Ørsted Company Fisheries Liaison Officer can be contacted using the details below:

Callum Vale	Email: CAVAL@orsted.com

3 Amendments from Previous Revision

Added/Updated	Removed	Description
	4	Updated summary for projects that have been completed.
4		Amended wording for Safety zone required for Array Cable Campaign.
	4 & 8.1	GFS A01 Fog Horn confirmed operational thus removed from NtM.

4 Notice to Mariners Summary:

Site	Lighting and Marking Status	Survey	Jack-Up Vessel	Other Works
Race Bank	D01, S01 Foghorn Inoperable A06, E01, L01, N02 Marine Lantern Extinguished	None	No	None
Westermost Rough	A07 Foghorn Inoperable & Marine Lantern Extinguished	None	No	None
Lincs	OK	None	Yes	None
Gunfleet Sands	A06 Foghorn Faulty F06 Marine Lantern Extinguished G07, G05 & C01 Marine Lantern out of sequence	None	No	Array Cable Replacement*
Hornsea One	A16 Foghorn Faulty	None	No	None
Hornsea Two	OK	None	No	None

- * Formal 500m safety zone in place
- ° Licensable activity
- ** 500m safety distance requested
- *** 100m safety distance requested
- **** 250m safety distance requested

Status of lighting & marking is correct at time of issue; any changes will be communicated through an updated version being issued.

5 Race Bank – Notice to Mariners

5.1 Lighting and Marking Status

D01, S01 Foghorn Inoperable
A06, E01, L01, N02 Marine Lantern Extinguished

5.2 Other Operations

There are currently no other operations planned for this windfarm

5.3 Cable exposure

As shown in the below chart, a survey undertaken in [July 2025] identified potential cable exposures at locations beyond the commonplace exposures within the 50m radius around wind turbine and offshore substation foundations. The position and extent of the cable exposures shown in the below chart is limited to the burial status observed at the time of the survey. Cable burial status evolves over time, often rapidly. Mariners should not assume otherwise. Cable burial status is monitored periodically, and further information will be provided following future survey campaigns. Ørsted advises mariners to maintain care when operating within windfarm array areas.

6 Westermost Rough – Notice to Mariners

6.1 Lighting and Marking Status

A07 Foghorn Inoperable & Marine Lantern Extinguished

6.2 Other Operations

There are currently no other operations planned for this windfarm

6.3 Cable Exposures

As shown in the below chart, a survey undertaken in [July-August 2024] identified potential cable exposures at locations beyond the commonplace exposures within the 50m radius around wind turbine and offshore substation foundations. The position and extent of the cable exposures shown in the below chart is limited to the burial status observed at the time of the survey. Cable burial status evolves over time, often rapidly. Mariners should not assume otherwise. Cable burial status is monitored periodically, and further information will be provided following future survey campaigns. Ørsted advises mariners to maintain care when operating within windfarm array areas.

7 Lincs – Notice to Mariners

7.1 Lighting and Marking Status

The lighting and/ or navigational warning systems are currently operational. No planned outages

7.2 Other Operations

There are currently no other operations planned for this windfarm

7.3 Cable exposure

As shown in the below chart, a survey undertaken in [July 2025] identified potential cable exposures at locations beyond the commonplace exposures within the 50m radius around wind turbine and offshore substation foundations. The position and extent of the cable exposures shown in the below chart is limited to the burial status observed at the time of the survey. Cable burial status evolves over time, often rapidly. Mariners should not assume otherwise. Cable burial status is monitored periodically, and further information will be provided following future survey campaigns. Ørsted advises mariners to maintain care when operating within windfarm array areas.

8 Gunfleet Sands – Notice to Mariners	
8.1 Lighting and Marking Status	A06 Foghorn inoperable F06 Marine Lantern Extinguished G07 Marine Lantern out of sequence G05 Marine Lantern out of sequence C01 Marine Lantern out of sequence
8.2 Other Operations	See below
8.2.1 Replacement of Array Cable between E05 & E06	
Start date:	07/02/26
Duration of work scope:	25 Days (including estimated weather)
Description of work:	Replacement of Array Cable between E05 & E06
Is this a licensed activity: Yes/No	Yes- CDM Work Scope
Safety zone required. If yes what distance?	Mandatory exclusion zone of 500m is in place where a vessel is attached or anchored next to an offshore structure at Gunfleet Sands Offshore Windfarm.

8.3 Cable Exposure

As shown in the below chart, a survey undertaken in [July-August 2024] identified potential cable exposures at locations beyond the commonplace exposures within 50m radius around wind turbine and offshore substation foundations. The position and extent of the cable exposures shown in the below chart is limited to the burial status observed at the time of the survey. Cable burial status evolves over time, often rapidly. Mariners should not assume otherwise. Cable burial status is monitored periodically, and further information will be provided following future survey campaigns. Orsted advises mariners to maintain care when operating within our windfarm array areas.

As a result of a sedimentary surface and above average flow velocities, bathymetry within the Gunfleet Sands array area is constantly evolving.

9 Hornsea One – Notice to Mariners

9.1 Lighting and Marking Status

A16 Foghorn Faulty

9.2 Other Operations

There are currently no other operations planned for this windfarm

10 Hornsea Two – Notice to Mariners

10.1 Lighting and Marking Status

The lighting and/ or navigational warning systems are currently operational. No planned outages.

10.2 Other Operations

There are currently no other operations planned for this windfarm
